Subject Matter Expert Information

Paul Beyer and **Clifton Staples** will be available throughout the workshop as a subject matter expert to answer technical questions and provide support as needed to counties during the breakout sessions. Paul is the Director of Smart Growth at the NYS Department of State. Clifton is a Climate Policy Analyst in the Office of Climate Change at NYS Department of Environmental Conservation.

Breakout Discussion Questions for Early Contemplation!

- What is your climate and health priority area(s)?
- What adaptation would you like to focus on?
- Are you expanding on an existing activity or starting something new?
- Are you the responsible entity for this adaptation or a “seat at the table”?
- Who else is working on this issue in your agency? In your community?
- Who else could/should be a partner?
- What are your next steps and what do you need to make it happen?
