

BACK TO SCHOOL, SAFELY

Vaccines have the power to keep your child safe against serious diseases as they head back to school.

Five important reasons, as reported by Centers for Disease Control and Prevention (CDC), to vaccinate your child:

- 1** Immunizations can protect your child's life.
- 2** Immunizations are very safe and effective.
- 3** Immunizations prevent epidemics.
- 4** Immunizations eliminate disease.
- 5** Immunizations protect future generations.

Immunization requirements will differ based on your child's age and their immunization history or health record. Find out today what vaccinations are required for your school-age child.

All kids going to public, private and religious schools, pre-K and day care, must get all required vaccinations unless they have a valid medical exemption.

Don't wait, talk to your healthcare provider today or schedule your child's vaccination appointment now!
