Vaccinate TODAY

According to medical and public health professionals, including the American Medical Association, American College of Obstetricians and Gynecologists, and Centers for Disease Control and Prevention (CDC), COVID-19 vaccination is recommended for everyone 6 months and older, including those who are pregnant, breastfeeding, trying to get pregnant now, or those who might become pregnant in the future.

COVID-19 vaccination is essential for your health and the health of your developing child.

Questions or Concerns?

Call your healthcare provider or go to *vaccines.gov* to learn more.

The COVID-19 Vaccine is:

SAFE

COVID-19 vaccines have received the most intense safety monitoring in U.S. history including analysis of vaccination during pregnancy, which has allowed public health officials to make science-based recommendations that keep people safe.

EFFECTIVE

While COVID-19 vaccines were developed quickly, the process included the same rigorous reviews required for all new vaccines. Before being authorized, more than 150,000 people participated in U.S. clinical trials of the vaccines, and now, hundreds of millions of vaccine doses in the U.S. have been safely administered.

FREE

COVID-19 vaccines are free and widely available throughout New York State, regardless of immigration or health insurance status.

VACCINES SAVE LIVES

Protect yourself and your child and get vaccinated today.
